

# The Right Controller for Vertical Balers

**CybaMICRO**

by **STARLOGIXS**

*Designed to provide control & safety features for baling machines*

**Coordinates control of the baler electronic motor and hydraulic solenoid valves while monitoring a number of sensor devices**

**Monitored dual safety door switch system detects any single system failure**

**Monitors all stages of pressing cycle and displays messages to operator on LCD display**

**Provides diagnostic fault messages on the LCD display**

**Multi-voltage, multi-frequency power system allows use on all the major international power grids without needing adjustment**

**Full LCD Message Display monitors controller status**

**Full Bale Detection & feedback**

**Door Switch Monitoring enhances safety to the operator**

**Controls an electric motor directly**

**Suits either three phase or single phase power supplies**
